

# LEON EKELUND

Full-Stack Developer

---

## ABOUT ME

Full-Stack developer based in Stockholm focused on building modern, scalable web applications with React, TypeScript, and Node.js. Passionate about creating clean user experiences, developing reliable backend systems, and turning ideas into production-ready products.

---

## EDUCATION

Technigo 2025-2026

### Full-stack development

A web development program focused on modern JavaScript (ES6+), TypeScript, React, HTML5, CSS, and server side development with Node.js. Ongoing project work ranges from core programming fundamentals to the creation of fully structured, production-style web applications built with current industry standards and best practices.

---

## WORK EXPERIENCE

Sortrace

### Full-Stack Developer Internship

Developed and launched a production-ready website for an AI startup using React, Tailwind CSS, Framer Motion, and Netlify Forms, focusing on responsive design and modern user experience.

Assemblin Charge

### Technical OCPP Specialist

Currently working with EV charger software and OCPP integrations, connecting charging stations to internal systems and troubleshooting communication issues through log analysis and diagnostics.

Building internal tools and automation solutions to streamline workflows, improve system reliability, and support day-to-day operations.

---
